

5. GI Requirements in Other Planning Documents

In compliance with Provision C.3.j.i.(2)(h), The City of San Leandro has updated planning documents that may affect the future alignment, configuration, or design of impervious surfaces within the Permittee's jurisdiction, including, but not limited to, streets, alleys, parking lots, sidewalks, plazas, roofs, and drainage infrastructure. The updated documents are listed and summarized below.

- General Plan

5.1 Summary of Updated Planning Documents

The above-listed planning document was updated. The section of our General Plan has been copied here:

Policy EH-4.11 Green Infrastructure. Consistent with the Municipal Regional Stormwater Permit for the San Francisco Bay Area, promote the increased use of green infrastructure as a means of improving stormwater quality. This shall include the incorporation of low impact development (LID) drainage design in public and private streets, parking lots, roofs, and other facilities. This also includes the use of best management practices to reduce impervious surfaces, including strategies using vegetation, soils, and natural processes to manage water and create a healthier urban environment.

Action EH-4.11.A: Green Infrastructure Plan Develop and implement a Green Infrastructure Plan, as required by the Regional Water Quality Control Board. The Plan should include a mechanism to prioritize and map areas for planned and potential projects, projections for impervious surface reductions, a process for tracking and mapping completed projects, design guidelines and details for green infrastructure projects, an implementation program, and an evaluation of funding options to cover construction and ongoing maintenance.

Action EH-4.11.B: Green Infrastructure Capital Projects Annually review planned capital projects to identify opportunities to incorporate green infrastructure.

Action EG-4.11.C: Green Infrastructure Outreach Conduct outreach and education to gain support for green infrastructure plans and demonstrate the benefits of such plans, such as water quality improvement, flood control, greenhouse gas reduction, and safer pedestrian and bike access.

5.2 Anticipated Updates of Additional Planning Documents

The City of San Leandro has identified additional planning documents as being in need of updates to incorporate GI requirements, as listed in Table 5-1. Updates to these planning documents have not yet been made for the reasons identified in the table.

Table 5-1: Planning Documents to Be Updated to Include GI Requirements

Name of Planning Document	Reason for Deferral of Document Update
None
