Response to Bomb Calls

The San Leandro Police Department has a policy for responding to bomb calls. The policy outlines the procedures and guidelines for officers to follow when they receive a bomb threat.

When a bomb threat is received, officers should contact emergency services immediately. They should also secure the area and provide a safe distance for other personnel and civilians.

The policy mandates that officers should wear tactical gear and use non-lethal force if necessary. They should also coordinate with other law enforcement agencies and bomb disposal experts.

In cases where the bomb is confirmed to be real, officers should work closely with bomb disposal experts to defuse and secure the device.

The policy also includes procedures for handling false bomb threats, which can cause significant disruptions to public safety. False bomb threats require a significant response and can lead to the arrest of the person responsible.

Overall, the San Leandro Police Department's policy for responding to bomb calls is designed to protect the public and ensure the safety of officers and other personnel involved.
Response to Bomb Calls

- Bomb threat report
- On-scene investigation
